PROJECT EXPERIENCE

2014/09-2015/06	<p>Automatic protection device for indoor rock climbing</p> <p>Responsibilities: Mainly responsible for market research, the allocation of funds, equipment procurement, and thesis writing work. The reply speech I wrote successfully promoted the subject to national projects. Rational allocation of capital, which makes the purchases of equipment completely and smoothly.</p> <p>Project Description: The project is the automatic protection device for indoor rock climbing. Based on the innovative combination of electric drive and timely feedback mechanism, we developed a prototype device of automatic protection. It's a good solution to the high labor costs climbing protection issues while security has been further improved.</p>
